Certificates of attendance are provided upon successful completion of the course.

This course is
15.5 contact hours/1.55 CEUs
18 contact hours/1.8 ceus for therapists licensed in Florida

BOC Provider # P2047
IL PT Provider # 216000074
FL OT provider #50-1442.
AOTA Provider #4487

NAS courses presented in MD are submitted for ceu approval to the Maryland Board of Occupational Therapy Practice and to the Board of Physical Therapy Examiners. NAS courses presented in Florida are submitted for approval to the FPTA for physical therapists licensed in Florida. North American is approved by the IDPR to provide ceus for license renewal for therapists licensed in Illinois. IL PT Provider #216000074. This course has been approved by the Nevada State Board of Physical Therapy Examiners for 1.5 units of continuing education. This course can be used for continuing education competency for license renewal for OT's and PT's in the state of California. North American Seminars, Inc. is an AOTA provider for continuing education. AOTA does not endorse specific course content, products, or clinical procedures. The Illinois, Kentucky, Missouri, Texas, Oregon, Tennessee, New Hampshire, Nevada, South Carolina, North Carolina, Virginia, Delaware, Rhode Island and Ohio occupational therapy regulatory boards accept courses presented by AOTA providers to meet the needs of OT continuing educational requirements.

Myofascial Release

From the Surface to the Depths

Presented by
Beth Ventre, PT

Day One

7:30	8:00	Registration
8:00	9:00	Anatomy and Physiology of Fascia • Embryonic development • Repair of connective tissue
9:00	10:00	Posture Evaluation (Lecture/Lab) • Find fascial restrictions • Quality of ROM
10:00	10:15	Break
10:15	11:15	Direct and Indirect Techniques • Signs of tissue release • Palpate directions of bind • Fascial release of diagrams using fulcrums
11:15	12:30	Techniques for Joint Surfaces (Lecture/Lab) • Enhancing joint play within the upper extremity joints • Enhancing joint play within the lower extremity joints
12:30	1:30	Lunch (On Your Own)
1:30	2:30	Release for Vertebra, Muscles (Lecture/Lab) • Palpating fascia between each vertebra • Learn palpation skills for releasing the membranes around the muscles • Biceps, gastrocnemius
2:30	3:30	Evaluation Tools to Find Key Restrictions (Lecture/Lab) • Perform gentle fascial drag through the feet • Feel from the head • Group practice
3:30	3:45	Break
3:45	4:45	Release for Visceral Restrictions (Lecture/Lab) • Small intestine membranes • Sigmoid area fascia • Thoracic membranes
4:45	5:30	How to Stay Present (Lecture/Lab) • Lessons in grounding • Lessons in centering • Lessons in boundaries
5:30	6:00	Specialized Fascia • Carpal tunnel • Scar tissue release

Day Two

8:00	8:30	Specialized Fascia (continued) • Carpal tunnel • Scar tissue release
8:30	9:30	Neck Release (Lecture/Lab) • Anterior • Posterior • Mid neck fascia
9:30	9:15	Break
9:15	10:30	Deeper Fascial Release (Lecture/Lab) • Along brain and Spinal Cord • Indirect cranial membranes
10:30	11:30	Fascial Release for Nerve Roots (Lecture and Lab) • Exacting palpation • Refining subtle touch
11:30	12:30	Lunch (on your own)
12:30	1:30	Rib Release (Lecture/Lab) • Improve inhalation • Free between the ribs • Increase rib excursion
1:30	2:45	Body Oriented Gestalt Application (Lecture) • Use of imagery • Learning techniques to support emotions
2:45	3:45	Applying Techniques in the Clinic (Lecture) • Working with specific diagnoses - neurologic clients - chronic pain and sports injuries • Questions and Answers

Call North American Seminars, Inc. if your facility is interested in hosting one of our courses or if you are an educator interested in presenting courses with North American Seminars, Inc. 1-800-300-5512

About the Educator

Beth Ventre, PT, graduated from the University of CT in 1982 with a BS in Physical Therapy. Beth has worked in a variety of settings including a community hospital, sports medicine clinic, and an outpatient manual therapy clinic. She is currently working in private practice in North Carolina. Beth began her training in manual therapy in 1986. She combines her skills in Muscle Energy Technique, Strain/Counterstrain, Craniosacral Therapy, Somato Emotional Release, Myofascial Release, energy Balancing, visceral manipulation, acupressure, and manual lymph drainage with traditional physical therapy to achieve successful patient outcomes.

Beth also trained at the Hartford Family Institute for 3 years of Body Oriented Gestalt Therapy in order to become skilled in dealing with the emotional support that is often needed for clients. In 1992, Beth began teaching Muscle Energy, and Myofascial Release courses across the US and Canada. Beth incorporates her 26 years of experience to provide an eclectic approach to her teaching style.

Elizabeth Ventre is approved by the National Certification Board for Therapeutic Massage and Bodywork (NCBTMB) as a continuing education Approved Provider.

Why You Should Attend This Course

This two day beginning to intermediate level course has been designed to provide medical professionals with the information and techniques needed to treat myofascial restrictions. Anatomy and physiology of fascia and its relationship to proper physiological function will be discussed throughout the course. This course will provide extensive laboratory time to develop assessment and palpation skills to identify and treat fascial restrictions. Techniques for surface and deep membranes, joints, selected organs and rib excursion enhancement will enhance the clinicians ability to develop more comprehensive evaluation and treatment programs for orthopedic conditions, neurological problems, chronic pain and sports injuries. The techniques can benefit patients of all ages with fascial restrictions and bring better balance back to the patients body. Each participant will receive a comprehensive manual detailing the information and techniques and will be able to immediately apply the information in the clinic.

Course Objectives

Upon completion of this course, participants will be able to:

- Identify key fascial restrictions through proper posture analysis.
- Understand the anatomy and physiology of fascia and its contribution to dysfunction, postural problems, loss of motion and pain.
- Develop enhanced palpation skills to identify areas of tension and treat fascial restriction.
- Utilize palpation skills to identify postural dysfunction.
- Evaluate and treat diaphragmatic restrictions and improve rib excursion.
- Identify fascial restrictions within the joints of the extremities and develop skills to improve range of motion and decrease pain.
- Perform techniques to decrease visceral restrictions.
- Decrease headaches and spinal pain by utilizing fascial release skills along the spinal cord.
- Increase spinal mobility and decrease back pain by applying fascial release techniques to the spinal region.
- Incorporate myofascial release into a rehab program to enhance functional and physiological outcomes.
- Apply myofascial release to a variety of diagnoses to obtain improved physiological and functional outcomes.
- Gain an understanding of how the physical body works together with the emotional body and incorporate techniques into a comprehensive program.
